

MOSAIC

Mosaic is an ancient technique, used by artists for the decoration of walls, floors, interiors and exteriors, as it is well preserved over time and resists to atmospheric agents.

During the Mosaic Course, different techniques will be introduced as students will learn to copy or create original images using small ceramic tiles. Those who are already experienced, can also use enamel or marble tiles for the creation of their original works.

To create a good mosaic it is necessary to study all its aspects: shadow and light, movement, the copy from reality, the use of warm and cold colors, depth, perspective.

At first the fundamentals will be introduced: the project of a mosaic, the preparation of the base, the cutting techniques of the different materials (tiles, ceramics, enamel, marble), the realization of a mosaic with direct and indirect method and the various laying techniques. Later, students will begin to experiment and develop their own style.

The advanced student can decorate furniture and objects, make decorated tiles for the garden, decorate vases, frames, boxes and much more.

The program can be customized according to the student's needs and previous experience.
