

ONE DAY ART WORKSHOP

The school offers private lessons of the duration of 3 hours for those who want to try their hand at a particular technique or perfect their skills in a discipline they already have experience with.

These workshops are held in the morning and during the time at disposal, participants will learn the basics of a technique of their choice among the following: Painting, Fresco, Ancient Techniques, Drawing and Sculpture.

The teacher will explain the technique of choice, introduce the use of the necessary materials and tools and guide the participants in the practical realization of a small work.

OUR WORKSHOPS

DRAWING: participants can start from the basics of drawing or focus on a specific technique. It is possible to learn how to draw the human figure through volumes and *chiaroscuro* or reproduce a still life.

ANCIENT TECHNIQUES: students will do a little painting on a wooden board already prepared for the egg tempera, learn the “spolvero” technique to transfer the drawing on the board, and then they will apply a gold-leaf decoration to certain predisposed areas of the painting.

FRESCO: students will learn how to create a fresco painting, working on a layer of fresh intonaco (“giornata”). They will not work on a wall, as it is expected from this technique, but on a board or tile so that it can be taken home.

PAINTING: students can learn how to paint with either acrylic colors or with oil colors, two very different types of paint, one that dries very fast, the other very slowly. In the case of oil painting, participants should be aware that the final work might not be completely dry in time to be carried home in a suitcase, and that it might get ruined if not packed carefully.

SCULPTURE: participants will learn how to make a little sculpture with clay. As the sculpture will still be fresh at the end of the workshop, it won't be possible to take it home, but upon request it can be fired in the kiln after a couple of weeks and the student can arrange its shipping with a courier. Firing and shipping costs are not included in the price of the workshop.

MOSAIC: After designing the image for the mosaic, students will learn how to prepare the work surface, how to cut the tiles and how to put them together to make the final design.
